TREE HOUSES THAT COME WITH THEIR OWN TREE!

No tree, no problem. Daniels Wood Land builds "Tree Houses that come with their own Tree!" which are the most creative play structures available on the market today. Each project is built-to-order, meaning we don't just grab an item that's been sitting around waiting for someone to buy it. Each tree house begins with a real log that has been reclaimed from local ranchers. We hollow it out using a 7' chainsaw, cut in a doorway and a window, add a cute little porch and an eave with a flower box, and install a short ladder which ascends through the clubhouse trap door. On top of the log is a cartoon-inspired, whimsical clubhouse with crooked windows and a sagging roofline. Every clubhouse features sturdy construction using Douglas fir framing, cedar board siding, and redwood for the balcony, staircase, and support posts. Recycled cedar shingles cap off the roof, weather-proven paint accents the exterior, and fun rust accents adorn the entire play structure. Most importantly, all of our tree houses are built with fun, durability, and safety in mind, guaranteeing years of imaginative play.

SELECTING YOUR TREE HOUSE

Selecting the right tree house for your family is an important decision and you should contemplate the following: 1) How large is your play area?, 2) Is access to the site available?, 3) How many children will be playing in the tree house?, and 4) What play accessories are adequate for their enjoyment (swing, slide, monkey bars, etc)? To make this decision a little easier, we've put all the information you need onto our website. We feature two versions for each tree house model, a standard and deluxe, meaning there is something just right for your family. We also have a large variety of play accessories available and you can pick from our selection of popular tree house colors. If you still need help deciding which tree house may best fit your family's needs, give us a call and we'll discuss what packages and options are available.

ORDERING YOUR TREE HOUSE

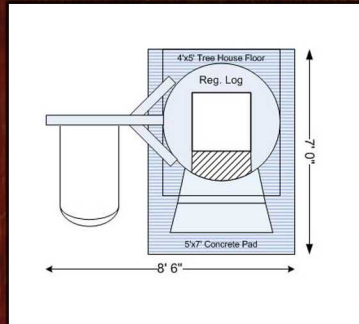

Visit our website (www.danielswoodland.com) then give us a call toll free at 800-441-3468. Our friendly team of sales associates will answer any questions you may have and help guide you through the purchase of your new tree house. Once you've made your decision, a 50% down payment will be required and can be made via check, Visa, Master Card, or American Express.

RECEIVING YOUR TREE HOUSE

We'll arrange all the shipping details and coordinate with you on a delivery date. Prior to your tree house's arrival, the installation site will need to be prepared with a small concrete pad. Please consult with your sales associate to determine the appropriate pad size for your tree house. Typically, our products ship via flatbed semi-truck and will arrive in pre-assembled large components (log with porch, clubhouse, balcony, staircase, etc), depending on which type you ordered. Due to their size and weight, a forklift will be necessary to unload and install the tree house. Each tree house comes with an easy-to-follow installation manual, all necessary hardware, and concrete piers. We even include some touch up paint in case your tree house gets a scratch during the installation process.

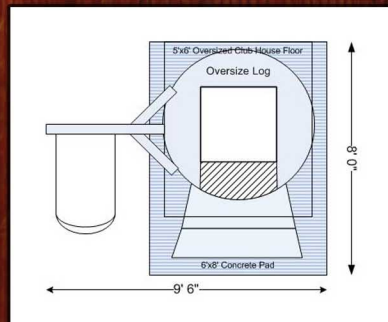

Original

Standard log (approx 4' diameter)
Log porch, door, & window w/ eave
4'x5' standard clubhouse floor
6 crooked windows

Belt swing
